

Abstract:

5 A digital book comprising a casing which is adapted to
be folded open and shut like a book and which has at
least one folding axis (A), a main part (1) and at least
one secondary part (2), said parts together forming a
book back part (BR). A display unit consists of at least
10 two parts and is arranged in such a way that when the
casing is folded out, the main part (1) and the at least
one secondary part (2) are each presented to the user
with at least one screen each, like pages of a book, for
looking at or optionally, for working on as required.
15 The digital book contains a control unit with means for
receiving, storing, processing and reproducing informa-
tion, and at least one operating unit (6) with operating
elements for using the digital book as a device for re-
ceiving/processing/reproducing information. Furthermore,
20 there is provided a supply unit (VE) which is designed
such that it has a receiving opening (VE') and a guide
and supply pin (7), by means of which the digital book
can be plugged in when the casing is folded shut, for
inputting and outputting information, for supplying en-
25 ergy and for storing the digital book.
